

EDUCATION

Sri Eshwar College of Engineering	B. TECH (CSBS)	CGPA: 7.1 5 th Sem	2023-2027
PMG Matriculation Hr.Sec School	HSC	79.5%	2021-2023
PMG Matriculation Hr Sec School	SSLC	Pass	2020-2021

INTERNSHIP

SPRINGBOOT INTERN (RampeX Technologies) 2025

Completed a Spring Boot internship that provided practical experience in building and integrating RESTful APIs. Gained a strong understanding of dependency injection, layered architecture, and backend best practices. Worked on developing and testing real-time application modules using Spring Boot frameworks. The college-organized internship significantly strengthened overall backend development and project implementation skills.

PROJECTS

DRIVER DROWSINESS DETECTION SYSTEM 2025

A MERN stack-based Driver Drowsiness Detection System that analyzes real-time video to identify signs of fatigue or closed-eye patterns. The application continuously monitors the driver's facial features using computer vision techniques. When drowsiness is detected, it triggers instant visual or audio alerts to prevent accidents. The system enhances driving safety by providing timely warnings and reducing the risk of fatigue-related incidents.

MULTI-VENDOR MARKETPLACE 2024

A Spring Boot-powered Multi-Vendor Marketplace where multiple vendors can register and manage their products. Customers can browse items, place orders, and track their purchases in real time. The platform provides separate dashboards for vendors, customers, and administrators. An admin panel oversees vendor registrations, product approvals, and overall system control.

VEHICLE TO VEHICLE COMMUNICATION 2024

Developed a LoRa-based Vehicle-to-Vehicle (V2V) communication system for real-time accident and hazard alert transmission. Integrated ESP32, GPS, and IMU sensors to enable long-range wireless communication, location sharing, and automated driver notifications. Designed a low-cost, internet-independent solution to improve road safety and reduce collision risks. Implemented real-time alert mechanisms to enhance driver awareness during emergency situations and hazardous road conditions.

ACHIEVEMENTS

Secured Finalist position in L&T Techgium 2026

2026, one of India's largest engineering innovation competitions, competing against 62,500+ students from 500+ institutions with an innovative LoRa-based Vehicle-to-Vehicle communication system focused on enhancing road safety.

LEET CODE: Contest 1500+ Ratings

HAKER RANK: Solved 250+ problems

SKILL SRACK: Solved 550+ problems

CERTIFICATIONS

Completed Learn React	Infosys 	2025
Completed Machine Learning A-Z: AI, Python	Udemy 	2025
Completed SQL-Basics (Standard)	SkillRack 	2024
Completed SQL(Basics)	Hackerrank 	2025

SKILLS

Programming Languages : C | C++ | Python | HTML | CSS | JavaScript

Core Concepts : OOP | Data Structures & Algorithms (DSA)

Frameworks : MERN Stack | Spring Boot

Tools & Databases : VS Code | GitHub | Excel | Canva | MongoDB | MySQL
